

THE LOOK OF BRICK WITH A MODERN TWIST

Architects and designers can now deliver the look and feel of brick with 48 beautiful textured colors of ceramic glazed tile. Perfect for both interior and exterior applications, Trikeenan's Boneyard Brick Collection offers a combination of surfaced TBX grade thin brick with the versatility and beauty of ceramic glaze. Depending on the application, location and quantity, Boneyard Brick may qualify for LEED credits for local sourcing and/or design innovation.

General Description:

Trikeenan BONEYARD GLAZED THIN BRICKS are double fired (to over 2100°F)* ceramic glazed brick available in a variety of sizes, colors, and textures. Boneyard Brick is for both residential and architectural uses, and may be installed using most industry accepted systems, including pre-cast panels. For hospitality and food service areas, our products can be special ordered with a smooth surface to ensure Health Department code compliance.

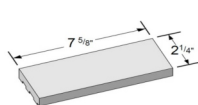

*Customer brick may be produced at other temperatures and with other processes.

Standard Description:

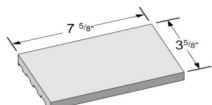

Boneyard Ceramic Glazed Thin Brick, as supplies by Trikeenan Tilework, Hornell, NY, shall be selection by the Architect/Designer/Owner from manufacturer's standard sizes, shapes, and glazes and shall meet the requirements of ANSI 137.1 as Special Purpose Tile; ASTM C1088-12, Grade Exterior, Type TBX, for physical properties; and ASTM 1405-12 Class Exterior for Properties of Finish. Most units will meet PCI specifications but need to be requested as such if required.

Boneyard Brick shall be ordered by full box quantities; glazed edges, corners, and edge caps are ordered by the piece. Please contact your local dealer for ordering, samples, and price information.

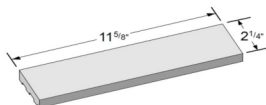

All bricks are 5/8" thick.
