

YOUR FAVORITE MOSAICS

Elementals, the Trikeen mosaic collection, offers a creative blend of sizes and colours crafted from our Basics series. Elementals are sold in meshed sheets by the square foot. A variety of patterns and color blends are available for customization. Designers may select from our standard collection of random blends (listed next) or create their own unique combination of up to three of our Basics colors.

COLOR OFFERINGS:

CRACKLE WHITE

A creamy white with a high gloss surface, may vary between quite creamy to slightly gray from batch to batch

FOG

A high gloss ranging from creamy to taupe gray that may creep from the edges of the tile with occasional flashes of black shadowing

GOLDSPOT BROWN

A deep umber brown with flashing golden ocher spotting

HONEY BEE YELLOW

A semi-gloss to high gloss surface ranging from a pale yellow to a rich satin honey color

MILK WHITE

A true white, consistent in texture and color density, occasionally matte, may range from bright to dull

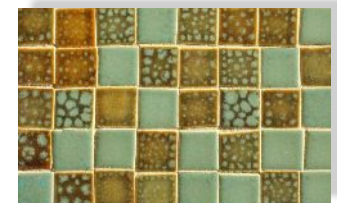

NEPTUNE'S BLUE

A glossy surface with a grainy quality and an unpredictable range of deep ocean blues and brown umbers that break over edges and/or relief tiles

SHARKSKIN

A gray range with a matte finish, varies from pearl white to a taupe gray, occasional black shadowing

SHEILING FOREST

A highly variant glaze that ranges from orange-brown to mossy greens and blues, shows hand-dipped lines

- 2" x 4" Soldier Bond
- 2" x 4" Herringbone
- 2" x 2" Grid
- 2" x 2" Diagonal Grid
- Rhomboid

See Price List for illustrations.

HANDCRAFTED VARIATION:

Trikeenan products are handcrafted using a variety of ceramic mediums and methods. Our tiles are formed from wet clay and hand-finished. Due to the nature of handmade tile, glazes will vary slightly to dramatically in color, density and surface quality from tile to tile and lot to lot. The tiles are fired in small, high temperature kilns, and the color range may be affected by air circulation, placement within the kiln, or whether a complete order fits into one or multiple kilns. Color variation is an aesthetic that enhances the depth of ceramic glazes. It is important to understand that while our samples provide a representation of our glaze ranges, variation is an inherent characteristic of the beauty of handmade tile. As you go through your selection process remember that no two tiles or firings are exactly alike. Please inquire about the degree of range any given color is likely to exhibit.

SPECIFICATIONS:

Some glazed tiles may be susceptible to crazing; this will not affect their suitability in any way and is not a defect in the tile. We highly recommend that you thoroughly seal all tile prior to grouting. Our many dimensional sizes allow for a limitless array of design options. All of our tile is made from high-fire stoneware resulting in not only a very distinct color palette but also an extraordinarily dense, hard tile, suitable for a full range of applications, from interior walls and light traffic residential floors, to pools and outdoor landscape design. We do not recommend commercial floor applications. Products can be used in exterior applications including freeze thaw climates. Trikeenan conforms to ANSI 137.1 as Special Purpose Tile. Our tile are produced, graded and packed to our stated specifications. For design inspirations and installation recommendations please contact your local dealer.

UNDERSTANDING MESHING:

All Elementals sheets are surface mounted with clear vinyl tape. Each pattern has its own unique conversion formula to determine the amount of sheets necessary to cover a specified area. Please use the conversion formulas listed on the Elementals Price Sheet for converting the square foot measurements to number of sheets. For example, a 1 x 6 brick bond pattern carries a conversion formula of "number of square feet needed x 1.07." If a client needs to cover 25 square feet, multiply 25 by 1.07 to get 26.75. We only sell full sheets, therefore 27 sheets of the 1 x 6 brick bond pattern would be needed.
